

Emergency Gas Leak Control Safety Kit

Ammonia / Chlorine Safety Kit to stop leakage of Hazardous gases from different capacity IS and DOT specification cylinder and Tonner

Gas leakage in recent times has become concern for public and media. Emergency Safety Kit is also recommended by Factory Inspector and Department of Explosive. Keeping this fact in mind, we have designed and developed an "Emergency Kit" which can be used in the event of gas leakages from different IS and DOT Cylinders / Tonners for gases like Chlorine and Ammonia

The Kit is a collection of more than 18 different items which covers all safety aspects relating to use of toxic gases and its control during leak

This Kit can be used in Emergencies like gas leakage from valve or spindle, defective threading in valves, fusible plugs, valve body

These Kits are designed to use by single person handling Emergency Gas Leak situation from valve

Advantages

- ✓ Single Person Use
- ✓ Leak control in less than 3 minutes^{*}
- ✓ Compact in size
- ✓ Multipurpose
- ✓ Economic
- ✓ Optimum Safety
- ✓ Operating Instruction video[#]

^{*}depends on practice [#] Optional
